Office Tower 1, Level 2,  
Singapore 609206

To Whom It May Concern

C&P would like to thank "WaterTech Pte Ltd" for an excellence job done.

C&P had engaged WaterTech's service in reviving an incomplete "Wastewater Treatment Plant Project". Despite the lack of technical information Watertech had come in like a member family of C&P to understand and to reorganize the project proper.

Watertech's display of skill, water chemistry knowledge and professionalism had greatly exceeded our expectation. Watertech came and studied our requirement, proposed a process that best suit our production processes. Now we own a Wastewater Treatment Plant that is operating with good efficiency and low operating cost.

What we are most impressed is Watertech display of teamwork and commitment. Despite the very short duration to complete the project, Watertech's team work without complain, and with good planning and professionalism they completed the project before the scheduled dateline, helping us to meet our commitment to our client.

Our company would highly recommend WaterTech Pte Ltd for any job they undertake, and look forward to working with them again should the need arise.

Best Regards
